EATON

Powering Business Worldwide

Why Eaton?

1

EATON'S POWER QUALITY LINE-UP CAN FIT ALL OF YOUR NEEDS – SMALL & LARGE

Eaton's choice of two different product classes features the highest quality products with the most advanced technologies, backed by unsurpassed service and affordability.

Our **Performance class** of products is designed to deliver differentiated power quality solutions and a low TCO.

Our **Essential class** of products is designed and positioned to meet even the most cost-conscious customer while providing a reliable and easy-to-set-up technology.

2

EATON PRODUCTS HAVE SUPERIOR TECHNOLOGY

Eaton solutions can help your organization:

- **Achieve lower TCO** with ABM® technology and longest battery warranty in the industry
- **Slash power and cooling costs** with industry-leading energy efficiency
- **Achieve ultimate reliability** with paralleling technology, redundant configurations and other high-availability features
- **Preserve valuable rack and floor space** with small-footprint designs
- **Maximize runtime for critical devices** with individual load segment control
- **Easily monitor and manage power** with Intelligent Power Manager Software Suite for monitoring and shutdown. Integration with vCenter allows users to view all connected power devices in a virtualized environment.

3

EATON DELIVERS UNPARALLELED 24 X 7 SERVICE & SUPPORT

At Eaton, our commitment to customer service doesn't end with the sale of the product. A key component of any purchase is the peace of mind that help will be there when you need it most.

4

EATON ALLOWS YOU TO TRY BEFORE YOU BUY

Eaton's Technology Challenge Program makes test-driving products simple and risk-free.
